

Neuron Open/Closed

Neuron Wireless Open/Closed sensor comes together with a small magnet and are suited to monitor status of doors and windows among others. Integrated battery ensures up to 10 years of battery life. All measurements are easily accessible from web, app or API.

The sensor transmits data to your nearby Neuron Gateway which then again communicates with the Neuron Cloud. Continuous measurement and instant alarm. Duplex communication enables adjustment of parameters such as measuring frequency.

Alarm levels are easy to set in the app and alerts can be received as push notification, emails or SMS. QR-code on the sensor ensures easy and accurate registration in the app.

Typical Applications

- Monitor doors and windows
- Position of industry gates
- Roof windows
- Count change in position

Advantages

- 👁 **Wireless sensor with integrated battery**
- 👁 **Immediate notice in case of anomalies**
- 👁 **Quick installation**
- 👁 **Operates 10 years on integrated battery**
- 👁 **Robust technology for demanding environment**

Neuron Open/Closed Sensor

Specifications

Part Number	421867
Measuring Range	On/Off
Measuring Frequency	Every 3 sec.
Report Frequency	Reports every 2 min. Or immediately if trigger for critical data transmission is reached, see below
Trigger for critical data transmission	Change in status on/off
Radio Frequency	868 MHz
Battery Type	Li-SOCI2 (3.6V)
Operating Time	Up to 10 Years *
IP Grade	IP21
Plastic Parts	POLYblend 65 FS
Operating Temperature Range	-40 - 85°C
Dimensions LxWxH	37x23x14mm

*Depends on measurement frequency, amount of critical data transmissions and ambient temperature
