

## Neuron PT100 High Temp

Neuron Wireless PT100 Sensor is to be connected to a PT100 high temp sensor and will transmit measured temperature to Neuron Cloud. The sensor comes with 40 cm wires and is easily connected to new or existing PT100 sensors. Integrated battery ensures up to 10 years of battery life. All measurements are easily accessible from web, app or API.

The sensor transmits data to your nearby Neuron Gateway which then again communicates with the Neuron Cloud. Continuous measurement and instant alarm. Duplex communication enables adjustment of parameters such as measuring frequency.

Alarm levels are easy to set in the app and alerts can be received as push notification, E-mails or SMS. QR-code on the sensor ensures easy and accurate registration in the app.

Typical Applications:

- Water temperatures
- Air temperatures
- Industry processes
- Cooling of transformers

### Advantages

- 👁️ **Wireless sensor with integrated battery**
- 👁️ **Immediate notice in case of anomalies**
- 👁️ **Quick installation**
- 👁️ **Operates 10 years on integrated battery**
- 👁️ **Robust technology for demanding environment**

### Neuron PT100

### Specifications

Part Number	422234
Measuring Range	-100°C to +650°C
Resolution	0.1°C
Measuring Frequency	Every 3 sec.
Report Frequency	Reports every 2 min. Or immediately if trigger for critical data transmission is reached, see below
Trigger for critical data transmission	10°C
Operating Frequency	868 - 870 MHz
Battery Type	Li-SOCI2 (3.6V)
Operating Time*	Up to 10 Years
IP Grade	IP 67
Operating Temperature Range	-40 - 85 °C
Connection Type	2 x RADOX 155 0.25 mm <sup>2</sup>
Material	POLYBlend 65 FS
Dimensions LxWxH	37x23x14mm

\*Depends on measurement frequency, amount of critical data transmissions and ambient temperature
