

THS Dashboard LED Facts

The THS Dashboard LED gives the driver immediate warning when deflation or high temperature occurs. The THS Dashboard LED communicates directly with the vehicle's THS Gateway and will therefore warn even if the gateway is in an area without cellular coverage.

The kit consists of:

- A LED indicator with TPMS symbol, 1 meter wires
- A electronic unit
- 1 meter power leads, 16 AWG

FEATURES	BENEFITS
• RGB LED Multi messaging	• Warns several alarm states
• Offline functionality	• Warns in areas without cellular coverage
• Easy and efficient installation	• Install directly in dashboard or in dummy button
• Early warning of slow-leaks	• Prevents unwanted stops and tyre explosions

THS LED status	
Red flashing	Fast leakage / high temp
Red solid	Slow leakage front axle (axle 1)
Yellow solid	Slow leakage other tires
Blue solid	No cellular service detected
Blue/green flashing	Startup condition no gateway detected
No light	Connected to gateway no errors
